

PIPELINE ROUTING MADE FAST & DEFENDABLE

Use Pivvot's Route to identify optimal paths for oil and natural gas transmission lines, without waiting weeks for results.

ACCELERATE ROUTING & PERMITTING FOR MAINTENANCE PROJECTS

- Generate least-cost, preferred routes for reroutes and new construction utilizing our data, platform and proprietary algorithm.
- Analyze land ownership, endangered species, geotechnical, and engineering data; all layered visually to expose constraints early.
- Generate crossing and impact reports to determine construction methodology, materials needs, and land acquisition costs.

Permitting Summary		
Permit or Review	Permit Triggered	Triggered By
Bald and Golden Eagle Protection Permit	No	Species Habitat
Conditional Letter of Map Revision	No	Floodplain
Easement Administrative Action (USDA-NRCS)	Yes	Land Ownership Potential Conflicts
Endangered Species Act Consultation (DOI-FWS)	Yes	Species Habitat Critical Habitat
Endangered Species Act Consultation (NOAA-NMFS)	Yes	Species Habitat Critical Habitat
Fish and Wildlife Coordination Act Review (DOI-FWS)	Yes	NHD Flowline NHD Waterbody
Fish and Wildlife Coordination Act Review (NOAA)	Yes	NHD Flowline NHD Waterbody
Floodplain Assessment	No	Floodplain
Native American Graves Protection Act Compliance	Yes	Land Ownership Potential Conflicts
NPS Permit	No	Land Ownership Potential Conflicts
Non-Impairment Determination	No	Land Ownership Potential Conflicts
Right-of-Way Authorization (DOI-FWS)	No	Land Ownership Potential Conflicts

Download a Permit Matrix in Minutes

Generate a clear, shareable list of required permits based on your site's location and data layers.

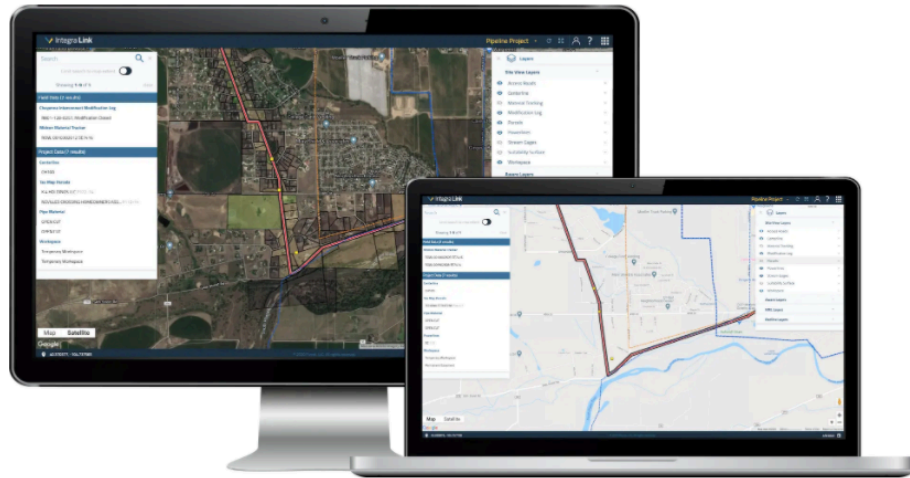

"Pivvot enables us to deliver more comprehensive assessments of our clients' oil and gas prospects, saving them significant time and resources."

Project Director, Engineering & Construction Firm

IMPROVE FIELD TO OFFICE COLLABORATION

- Communicate with field crews, office staff, decision makers, and third-party contractors with the Pivvot platform.
- Users of all levels can view and edit modification logs, capture pipe tally information, view parcel data and more.
- It's simple and fast on any device with a dynamic search function, integrated driving directions and data collection capabilities.

ACCELERATE PROJECT SCHEDULES

Power utilities, engineering firms, or environmental teams can conduct virtual site analysis to reduce or avoid time in the field, expediting project schedules.

IDENTIFY PERMIT REQUIREMENTS

Analyze land ownership, floodplains, endangered species habitats and more to build permit lists and reduce environmental and societal impact.

MAKE CONFIDENT, DEFENSIBLE DECISIONS

Reduce permitting hurdles and re-routes by selecting routes backed by data and aligned with environmental and regulatory needs.
